FEDERAL SUPPLY GROUPS AND CLASSES

The Federal Supply Classification System has been developed and adopted by the Office of the Secretary of Defense for use in classifying items of supply identified under the Federal Cataloging System.

The first two digits in the four-digit code number identify the Federal Supply Group (FSG). The FSG identifies the commodity areas covered within the group.

The last two digits of the four-digit code number identify the Federal Supply Class (FSC). Each FSC covers commodities that are relatively homogeneous in respect to their physical or performance characteristics; commodities that are usually requisitioned or issued together; or commodities that constitute a related grouping for supply management purposes.

In most instances, gaps have been left between each group and between numbers assigned to adjacent classes to allow for the addition of new classes, in logical sequence, because of technological advances or other changes. To determine the FSC, select the appropriate FSG from the below listing and enter it at the website <http://www.dlis.dla.mil/H2>>. The website displays all of the FSC's for the entered FSG.
